

IIT-Patna scholars developing virtual doctor for early diagnosis of diseases

TNN | Sep 12, 2022, 08:26 AM IST

PATNA: In a novel and path-breaking initiative, IIT Patna is busy developing a 'virtual doctor' to assist medical practitioners and facilitate early diagnosis of the disease.

The 'virtual doctor' when fully developed, will serve as a disease diagnostic assistant (diagnosis chatbot), conducting a thorough symptom investigation and preparing a diagnostic report for doctors. Besides, it will also serve as the first point of contact for the ailing people in remote areas where doctors are hard to reach.

The initiative for this unique, people-friendly research has been taken by IIT Patna scholar Abhisek Tiwari who has been awarded the highly prestigious Prime Minister Research Fellowship for the project. IIT Patna's associate professor Sriparna Saha, IIT Mumbai's professor Pushpak

Bhattacharya and AIIMS Rishikesh senior doctor Minakshi Dhar are all collaborating with him in this project.
